# Subject index

A

Acetylcholine 69, 139, 227, 413, 657
– receptors 428
– responses 37
Acid-base status 257
Actin 30
Action potential(s) 92, 563
– – duration 394
– potential treshold 102
Activated current 159
Actomyosin complex 48
Acute-phase response 554
ADP 30
Adenosine concentration 192
– monophosphate 464
β-adrenergic blockade 257
β-adrenergic stimulation 464
Adrenergic stimulation 250
Adrenoceptors 250
Afterhyperpolarization 234, 614
$Ag^+$ 243
Alanine-activation 342
Aldosterone 476
Alinidine 83
Alkali-earth cations 326
Alpha-1 adrenoceptors 495
Alveolar epithelium 464
AMP 169
Amidephrine 495
Amiloride 464, 476
Aminoglycosides 517
4-amminopyridine (4-AP) 408
Anabolic hormone 349, 356
– steroids 272
Angiotensin II 55, 132
Anion channel 632, 641
Anion-conducting channels 153
Anticholinergic drugs 524
Anticholinesterase drugs 428
Antisecretory factor (ASF) 648
Anus 296
Aortic endothelial cells 385
Apical chloride channels 487
– membrane 243, 476
Arterial pressure (MAP) 250
Arteriovenous anastomoses 589
ATP analogs 313
ATP-sensitive $K^+$ channel 313
– – channels 313
– potassium channel 169
Atrial cardioballs 121
– cells 227
– fibres 326
– myocardium 198
Atropine 524
Autoregulation 441
Axial heterogeneity 481
Axons 296

B

$Ba^{2+}$ 326, 408, 596
$Ba^{2+}$-sensitive short-circuit current 362
Barium 313
Basilar arteries 92
Basolateral membrane 288, 476
B-cell membrane potential 457
Bicarbonate transport (renal) 501
Binning data 530
Bioelectric activity 563
Blood flow 250, 356, 369, 524, 589
– – of brown adipose tissue 44
– pressure 441
– – control 450
Bradycardic agent 83
Brown adipose tissue 44
α-Bungarotoxin 37
Bursting neurons of Helix 627

C

Ca-activated cation channels 627
$Ca^{2+}$ 326, 408
$Ca^{2+}$-activated $K^+$ channels 342, 614
$Ca^{2+}$ and contractility 304
$Ca^{2+}$ channel 243
$Ca^{2+}$ current 23, 596
$Ca^{2+}$ dependence 288
$Ca^{2+}$-dependent $K^+$ channel 234
$Ca^{2+}$ sensitive microelectrodes 63
$Ca^{2+}$ sensitivity 30
$Ca^{2+}$ transient 132
$Ca^{2+}$ transport 63
$Ca^{2+}$-free perfusion 657
Ca-current 15, 385
Caffeine 510
Ca-free-solution 664
Ca ions, myocytes 604
Calcemia 165
Calcium 165,313, 510
Calcium-activated potassium channel 169
– – channels 614
Calcium antagonism 623
– channel currents 517
– channels 345, 557
– current 102
Calcium-dependent K current 517
– – release of transmitter 623
Calcium paradox 657
– release 121
cAMP 464
cAMP-analogue 23
Cannulation 679
Capillary bed 369
– supply 356
Carbachol 69
Carbohydrate feeding 652
Carbonic anhydrase inhibitors 501
Cardiac alpha-1 adrenoceptors 495
– $Ca^{2+}$ current 23
– catheterization 272
– cells 7
– myocytes 212
– output 257
– performance 272
– potassium channel 217
Cardioballs 121
Carotid body tissue 204
Carrier transport 648
Catecholamines 217, 464
Cation channels 169
Cation-selective channel 243
CDP 30
$Cd^{2+}$ 234, 243
Cell culture 1
– impedance 471
– membrane potential 505
– membranes 173
– $Na^+$ activities 279
– volume regulation 223
Central nervous system 37
Channel, anion 153
– gate 641
– gating 530
Channels 614
– in myometrium 560
Chemosensitive nerve fibers 143
Chloride channels 487, 560
– ion 648
– secretion 487
Chloride-thiocyanate interaction 153
Chloride transport 648
Chloroquin 55
Cholecystokinin ($CCK_8$) 284
Cholesterol 165
Chronotropic effects 495
Citrate synthase 356
$Cl^-$ conductance 471
$Cl^-$-dependence 501
Clonal GH3 pituitary cells 345
Cl replacement 173
$CO_2$ equilibration 257
Colon 279, 296, 362, 476
Colon cells ($HT_{29}$) 487
Colonic carcinoma cells 487
– epithelia 173
Concentration-jump technique 335
Conductance channel 614
– kinetics 596
Contractile properties 433
– proteins 510
– system 75
Contractility 304
Contraction 185, 433
– kinetics 413
– mechanics 272
Converting-enzyme inhibition 450
Cooling 376
Copper 554
Coronary flow 657
– resistance arteries 664
Cs 159
$Cs^+$ 243
CTP 30
Cultured PC 12 cells 223
– smooth muscle 55
Current, cardiac, hyperpolarizing-activated 139
Current-clamp 15
Cutaneous blood flow 524
Cyclic AMP 657
– GMP 657
– nucleotides 657

Cytochalasin B 223
Cytoskeleton 223
Cytosol 671

D

D600 (gallopamil) 75
db-cAMP 487
7-Dehydrocholesterol reductase 165
Denervated muscles 433
Desensitization 227
Developing spinal cord cultures 563
DIDS 501
3,4-diaminopyridine 394
Diaphragm fibers 394
– muscle 623
Diarrhoea 648
Diastolic depolarization 83, 198
Diffusion shunt 263
Dihydro-$\beta$-erythroidine 37
Diluting segment 63
Diphenhydramine 23
Dipyridamole 192
Diuretic effect of muzolimine 674
Divalent cations 159
d-Tubocurarine 37
Durabolin 349,356

E

Electrical activity 457
Electrolyttransport 471
Electrotonic influence 198
Endogenous pyrogen 554
Endothelium-derived relaxing factor 385
Endotoxin fever 220
End-plate current 428
Endplate potentials 75
Endurance 349
– training 272, 321
Enzyme activities 433
– activity 321
Epidermis 165
Epithelia 243
Epithelium 464
Euthyroid rats 48
Evaporative heat loss 524
Excised patches 677
Excitation-Contraction-Coupling 326
Exercise 143
– in man 652
Extracellular calcium 185

F

Fast-twitch muscle 48
Fetal sheep temperatures 376
Fibre types 349
– type transition 321
Fibrinogen 554
Fire polishing 338
Flow 204
Fluid transport 464
Force: velocity 185
Fura 2 401
Furosemide 63

G

GABA 648
Gastrointestinal hormone 648
Gating channel 604
$GH_3$ anterior pituitary cell line 614
"Gigaseal" glass pipettes 212
Glass pipettes 212
Glial potassium uptake 1
Glomerular filtration rate 441
Glossary 567
Glucagon secretion 284
Glucose 284, 457
– utilisation 192
Glycogen synthesis 652
Glycolytic and oxidative muscles 369
Growth 349
GTP-analogues 23
GTP-binding proteins 227
GTP-dependent transducer proteins 23

H

Heart 263, 326, 340
– cells 15
– rate control 495
Heterogeneity 204
Hexamethonium 37
Hill "n" value 30
Histamine 23
Human colon 173
– – cells 487
Hydrogen clearance 204
Hydronephrotic mouse tissue 55
Hyperaldosteronism 279
Hyperpolarization 159
Hypertension 450
Hypocholesterolemia 165
Hypothalamic stimulation 44
Hypothyroid rats 48
Hypoxia 263
Hypoxic myocardium 671

I

Impulse formation 198
Inactivation 75
Indomethacin 505
In-dwelling cannula 679
Inorganic phosphate 657, 671
Inosine 457
Instruments and techniques 338, 340, 530
Insulin producing tumour cells 169
– release 457
– secretion 284
– sensitivity 192
Interleukin 1 554
Intestinal potassium secretion 362
Intracellular 1
– potentials 471
– recordings 102
Intracoronary injection 495
In-vivo $CO_2$ bufferline 257
Inward rectification 102
– rectifier 385
– rectifier current 7
– -rectifying K current 604
Ion channel(s) 112, 169, 530
Ionic fluxes 457
Ionophoresis 1, 83, 428
Ion regulation 1
– transport 173
Iron 554
Isolated rat heart 657
– – pancreatic islets 284
Isoproterenol 596

J

Juxtaglomerular epitheloid cells 55

K

$K^+$ channel(s) 227, 234, 313, 342
$K^+$ single channels 288
K-concentration 75
K conductance 173
K-contracture 75
K current(s) 121, 517, 604
Kidney 63
–, frog 505
–, muzolimine 674
–, rabbit 288, 481
–, rat 501
– afferent arteriole 55
– blood flow 441
– C 132
$K^+$ current 596
K-saline 664

L

$La^{3+}$ 243
Lactate output 369
Lactic acid 143
L-alanine 342
Langendorff heart 263
Laryngeal afferents 420
Length-tension relation 664
Leucocyte count 554
$Li^+$ 1
Liver cells 342
Liver storage 181
Local flow velocity 204
Loop diuretics 674
– of Henle 674
Lorentzian component 243
Lymph vessel 679

M

Magnesium 313
Maxillary blood flow 589
Maximum likehood fitting 530
Mecamylamine 37
Mechanical activity 394
Medullary respiratory neurones 420
Membrane conductance(s) 102, 173, 279
– currents 121
– excitability 614
– properties 92
Mepacrine 505
Mesenteric artery 55, 132
– circulation 250
– resistance vessel 664
– vascular bed 250
Metabolic acidosis 257
$MgADP^-$ 30
$MgCDP^-$ 30
Mg ions, myocytes 604
Microelectrode(s) 204, 340, 471
Microfilaments network 223
Mineralocorticoids 362

Miniature endplate potential 623
Mitochondria, volume 369
Monensin 55
Monovalent cations 159
Motor nerve terminal 408, 623
mRNA 112
Muscarinic $K^+$ channel 227
– receptor 69
Muscle 153
– afferents 143
– contraction 340, 369
– fibers 510
– fiber type 652
– growth 349
– membrane 632
– receptor 143
Muscles 143
Muscle stiffness 321
Muzolimine 674
Myocardium 198, 671
Myocytes 227, 604
Myofibrillar ATPase activity 48
Myogenic tone 664
Myosin 30
– light chain phosphorylation 304
– – chains 433
– phosphatase 304

N

$Na^-$ absorption 279
$Na^+/Ca^{2+}$ exchange 401
$Na^+$ conductance 471
$Na^+$ cotransporter 342
$Na^+$-dependence 501
$Na^+$-deprived rabbits 279
$Na^+$-glucose co-transport 464
Na current 7
– ions 604
$Na^+2Cl^-K^+$ cotransporter 674
Nandrolone phenylpropionate 349, 356
Neocortical neurons 102
Neomycin 517
Nerve cell membrane 648
– terminal excitability 408
Nervous system 1
Neuromuscular junction 428, 623
Neuronal sodium channels 112
Nicardipine 243
Nicotinic acetylcholine responses 37
Nitrophenylglyoxal 501
5-Nitro-2-(3-phenyl-propylamino)-benzoate 487
Noise analysis 530
Non-shivering thermogenesis 376
Noradrenaline 132, 557, 657
Norepinephrine 376
Nucleotide-sensitive ion channels 169
Nystatin 173, 476

O

Oil-gap voltage clamp 7
Oligodendrocyte 1
Ontogeny 362
Ouabain 401
Oxidative and glycolytic muscles 369
– metabolism 356
Oxygen consumption 263, 369

P

Pacemaker current 83, 139
– fibers 198
Pancreatic B-cells 457
– islets 284
Papaverine 657
Paracellular path 464
– shunt pathway 63
Patch clamp 37, 288, 342, 385, 557, 560, 614, 632, 641, 677
– – pipettes 212
– – 112, 338
– – technique 335
PC12 cells 223
Pelvic nerve 296
Perfluorodecalin 181
Perfluorotripropylamine 181
Permeability 153
Pertussis toxin 132
Phenylalanine 505
Phosphorus 165
Photolabile nifedipine 326
Pituitary cells 345, 517
Polisher for patch pipets 338
Portal vein 557
Posterior hypothalamic stimulation 250
Post-inspiratory activities 420
Potassium 1, 143
– channel(s) 169, 217, 408, 560, 614
– – blockers 394
– conductance(s) 408, 505
– current ($I_K$) 217
– secretion 362
Prazosin 495
Propranolol 376, 495
Protein 132
Proximal straight tubule 481
– – tubules 288
– tubule 501
Pulmonary afferents 420
Purkinje fibers 83

Q

Quantal content 623

R

Rb 159
$Rb^+$ 243
Re-acceleration 413
Receptor recycling 55
Rectification 102
Regional blood flow 44
Relaxation 326
Renal blood flow 441
– circulation 450
Renin-angiotensin system 450
Renin release 441, 450
Respiratory acidosis 257
– neurones 420
– rhythm generation 420
Retinal ganglion cells 37
Reversal potential 596
Rubidium 153
Ryanodine 510

S

S2/S3 segment 481
Sacral visceral afferents 296
Sarcoplasmic reticulum 121, 510, 557
Sceletal muscle 369
Sensory ganglion 563
Serotonin 413, 664
Shivering 376
Short circuit current 476
Shortening velocity 185
Sigmoidal onset 596
Single cardiac cells 7
– channel(s) 69, 677
– – currents 530
– – recording(s) 530, 627
– -electrode-voltage-clamp 102
– electrode voltage clamp 234
– heart cell 15
– smooth muscle cell 335
– ventricular cells 596
Sino-atrial node cells 139
Sinus arrhythmia 198
– node 198
– venosus 159
Skeletal muscle 30, 48, 143, 192, 356, 394, 632, 641
– – fibers 510
Skin blood blow 524
Skinned rabbit soleus fibers 30
– skeletal muscle fibers 510
– smooth muscle 304
Skin vitamin D3 synthesis 165
Slow action potential 15
Smooth muscle 55, 304, 413, 664
– – cell(s) 69, 132, 185, 335, 401, 557
Sodium 102
– -bicarbonate cotransport 481
– channel(s) 69, 112
– coupled transport 505
– ions 345
– pump 476
Solution changes 677
– exchange 212
Somatostatin secretion 284
Spinal cord cultures 563
– – explants 563
$Sr^{2+}$ 326
Stellate ganglion stimulation 495
Stiffness modification 321
Stomach muscularis 185
Strength training 321
Stress 554
Striated muscle 356
– muscle growth 349
Strontium 313
Sulphate dependence 501
Surfactants 181
Suxamethonium 376
Sweat duct cells 471
Sweating 524
"Sylgard" polymer 335
Sympathetic control 589
– innervation 44
– nervous system 250
– neurone 234
Systemic blood pressure 589

T

Tachyphylaxis 55, 132
Tannic acid 632
TEA-sensitive apical K conductance 173
Techniques 212

Tension 30
– activation 326
12-O-Tetradecanoylphorbol 13-acetate (TPA) 132
Tetraethylammonium 1, 153, 394
– (TEA) 408
Tetrodotoxin 563
Thermal physiology, glossary 567
Thermogenesis 44
Thermoregulation 220, 376, 524
Thiocyanate-chloride interaction 153
Threshold level 530
Thyrotropin-releasing hormone 614
Toad urinary bladder 243
Tolbutamide 169
Toxin F 37
Tracheal smooth muscle 413
Training 272, 321
Transient outward K current 385
Transmitter release 408, 623
Treadmill exercise 272
Trifluoperazine 505
Triiodothyronine 376
Troponin 30
Tubocurarine 234
Tumour cells 169
Twitch fibres 75
– force 340
– tension potentiation 48

U

Urethra 296
Urinary bladder 296
Uterus 560
UV irradiation 165

V

Vacular smooth muscle 55
Vascular smooth muscle cells 557
– system 181
Vasoconstrictor responses 589
Vasodilation 524
Vasopressor substances 250
Ventricular cells 596
– myocytes 23, 217, 313, 596, 604
– volumes 272
Ventromedial hypothalamus 44
Verapamil 243
Veratridine 112
Visceral afferents 296
1,25 Vitamin D3 165
Voltage-clamp 15, 69, 153, 159, 217, 234, 326, 428,Voltage-clamp 604
– 7
– sensor 641
Volume regulation 223

W

Whole cell clamp method 596
Whole-cell-recording 212

X

Xenopus oocytes 112

Z

Zinc 554, 623, 632
